WAVE GET OUT OF THE BOX! **/ayage**

NORMAL, HEALTHY HIGH-LIFT, COLOR-TREATED HAIR

Cheveux Normaux, Sains Volumineux Et Colorés

Pelo Normal, Saludable Decolorado, Teñido

how to **WAVE·Layage** GET OUT OF THE BOX!

WAVE·Layage Directions

This formula should be used on normal, healthy high-lift or color-treated hair – pH 7

IMPORTANT

- Do not proceed if client has experienced an allergic reaction to any previous wave or other Cosmetic product, or if scalp is Sensitive or shows evidence of sores, abrasions, or abnormal conditions.
- Examine hair for elasticity, texture, breakage or discoloration. Always perform a preliminary test curl. If hair breaks or discolors after the curl is dried and combed, do not proceed.
- Do not allow waving lotion to remain on skin or scalp. If this occurs, blot with water, then with neutralizer, and again with water.
- Avoid eye and ear contact. Should contact occur, flush thoroughly with clean, cool water.

GLOVES REQUIRED DURING THIS SERVICE!

Watercolors
Wave·Layage
Includes:

Neutralizer
A Tube

Waving Lotion B
in Mixing Tub

Functional
Keratin Serum

Separate
Accessory Kit
Includes:

Black, logo embroidered,
microfiber towel 14" x 26.5"

24 Bendies

8 Pink 3/4" x 10"
8 Green 1" 1/8 x 10"
8 Blue 1" x 10"

3-in-1 Comb

1 Mix "A" Tube into "B" Waving Lotion tub, mix well with brush.

PROCEDURE

- Shampoo hair with Remove-All Plus. Towel dry.
- Divide hair into sections according to hair density. Pre-sectioning the hair allows very fast wrapping.

NOTE: If performing a color retouch, apply color with a color brush before sectioning.

GLOVES REQUIRED DURING THIS SERVICE!

- Squeeze "A" tube into the Wave-layage Waving Lotion B mixing tub and use wave brush to mix well. 1
- Take first section, starting from the nape and apply lotion in balayage pattern to hair you want waved. No end paper is required. 2
- Starting at bottom of hair, roll hair around bendie in spiral formation so hair is not overlapping itself, except the end to prevent untucking, then bend opposite of wrap to close. 3

NOTE: If you want to leave the ends straight, start approximately 1/2-1" from bottom.

- After applying lotion and wrapping each section, check test curl in 10 minutes. The wave should take approximate 20 to 30 min total. Normal to resistant hair can be processed with heat. 4
- Leaving hair on bendies, rinse until water runs clear and hair feels squeaky; 5 minutes short hair, 10 minutes long hair.
- Blot wet hair with a Microfiber towel and air neutralize for 5-10 minutes.

NOTE: You can apply cotton around hairline before applying FKS.

- Apply FKS: allow to sit and saturate the hair for 5-10 minutes. 5
- Apply neutralizer directly over FKS: 5 minutes for short hair, 10 for long hair. Take bendies out and work neutralizer through hair, then rinse. 6
- Dry and style the hair as desired.

2 Apply in balayage pattern

3 Wrap hair around bendies

4 Check test curl

5 Apply Functional Keratin Serum

6 Apply Neutralizer over FKS
